Math Module: Group Activity

Work in groups of 3-4. Write all group members names at the top of the page.

1. Why use math to describe something that could also be said in words?

2. Give an example of a conclusion that couldn't have been reached without math.

3. Come up with one thing that is better described in math, one that is better described in native language.

4. What is a second derivative? Give an example of one in nature.

5. Is math invented or discovered? Justify your response.
